Total: 189 species

B = Breeding, confirmed (41 species)

This species list follows the checklist order and nomenclature as of the 60th supplement to the 7th edition of the American Ornithological Society's Check-list of North American Birds, published June 24, 2019. Family names are shown in boldface type and sorted alphabetically.

The list was compiled by Walter Thurber, Research Partner, on behalf of the Parsons Field Institute, McDowell Sonoran Conservancy.

Numerous volunteers from the McDowell Sonoran Conservancy, the Arizona Field Ornithologists, the National Audubon Society, and other organizations participated in surveys and submitted photographs that made this list possible.
